SELF INTRODUCTION

Born January 30, 2007 in Harbin, I am an ethnic Han and a member of the Communist Youth League of China. I love coding for physical-world interaction, with solid math physics foundations, and secondary interests in philosophy and social sciences. I have rich volunteer student work experience, good teamwork awareness and a strong sense of social service. Academically, I focus on cross-disciplinary research combining AI, control engineering and natural science, continuously improving my programming and engineering capabilities.
