I am an undergraduate student in the Department of Automation at Tsinghua University, with a primary interest in artificial general intelligence. My research interests include theory of mind, world models, embodied cognition, robotics, and machine learning. I have experience with Python, C/C++, MATLAB, LaTeX, and common research tools, and I hope to explore intelligent systems that connect cognitive principles with practical engineering.

Education Background

Tsinghua University

2025 – Present

Department of Automation

- Academic focus: Artificial General Intelligence.

Harbin Deqiang Senior High School

2022 – 2025

Course Projects and Experience

Intelligent Vehicle Scheduling Based on Multi-Agent Reinforcement Learning

Spring 2026

Personal Skills

Programming	Python, C/C++ and MATLAB.
Tools	LaTeX, Overleaf, VS Code, Jupyter Notebook, GitHub
Languages	Chinese native; English reading and writing for academic papers.
Strengths	Independent learning, careful documentation, and teamwork.
Knowledge	Machine learning, deep learning and reinforcement learning.

Research Interests

Theory of Mind	Machine Learning	Robotics	World Model	Embodied Cognition	Vibe Coding
